

3rd meeting-25-02-2024

Meeting Minutes:

Raised some questions and unresolved issues regarding the current progress:

- i. Regarding the evaluation section, besides the automatic metrics evaluation using BLEU, ROUGE, and BERTScore, how to conduct manual evaluation and determine the correctness of the results.
- ii. Some minor issues encountered during the frontend-backend connection process, such as default values for dates, input discrepancies, etc.
- iii. Discussed the issue concerning baselines. Due to the lack of prior research teams using the same database for similar question-answering systems, it's challenging to establish a suitable baseline for comparison.
- iv. Addressed some concerns regarding charts and graphs in the report.
